Summary

As a Front end developer with over 4 years of experience, I am a detailed-oriented problem solver with a passion for creating innovative solution. My experiences working remotely on various contract jobs has taught me the importance of clear communication, adaptability, and self-motivation. I excel in collaborating with cross-functional teams and have a proven track record of delivering high-quality software products on time and within budget. My technical expertise includes proficiency in various programming languages, tools, and frameworks, and I am always eager to learn new skills and technologies. Overall, I am a dedicated and enthusiastic software engineer committed to delivering solutions to help businesses achieve their goals.

Education

ALX Holberton

Software Engineering • Ikeja, Lagos

09/2023

- Currently completing courses in Software Engineering remotely.

Houdegbe North America University

Computer Science

08/2016

- Graduated with Bachelor Of Science certificate
-

C, HTML, CSS, JavaScript, ReactJS, Svelte & SvelteKit, Remix.run

Experience

Perseeve

Contract Web Developer • Ikeja, Lagos

01/2023 - 02/2023

Perseeve lets users earn money by sharing locations or places in real-time to anybody from their phones.

- I am responsible for the development of the web UI. This project is built using SvelteKit.
- Previous version was currently built using HTML, CSS and Javascript. The new version is currently under development using SvelteKit.
- It will feature a map interface where users will be able to request and see locations or places in real time.
- A wallet system to send or receive payments. It is based on the Blockchain technology.
- A minimal followers/following list UI and a few more...

Technolcast

Contract Web Developer

08/2021 - 02/2022

- I developed the website UI to create a more visually appealing, user-friendly experience
- I developed web applications for the company's clients, resulting in increase in sales
- I developed a web application for a dynamic small secure file sharing system with a minimal modern UI and file sharing features

Edves

Intern Web Developer • Ikeja, Lagos

08/2018 - 12/2018

- I worked with departments across the company, including marketing and project management, in developing new ideas, initiatives, products, and services
- I researched and implemented correct coding practices for SEO, resulting in more traffic and visibility.
- I managed a range of websites for companies in different industries.
- I redesigned Edves website to create a more visually appealing, user-friendly experience

12Musts

Contract Web Developer

07/2017 - 02/2021

- Originally, I built using WordPress and WordPress templates.
- After some months, I rebuilt the app's front-end using React. Developed the back-end using Node.js, Express.js for creating REST/RESTful APIs, and JWT for user authentication using MongoDB for data storage.
- I implemented features like image/file upload, user authentication and authorization and lots more.
- I integrated PayPal as a payment method on the web app.
- I simplified the process of booking tours and purchasing travel tickets.

Languages

English, Yoruba, Pidgin

Side Projects

Online Tutoring App API (<https://github.com/Xemicolon/online-tutoring-app>)

The online tutoring app API is a small app for tutors and students used for booking lessons and classes.

- Built the API for this project using Node.JS and Express.JS, MongoDB for data storage, JWT for user authentication
- Perform CRUD operations based on user permissions.

Blog App (<https://github.com/TobiLight/remix-blog>)

A blog app with admin panel to create, delete or update posts, manage users and comments.

- Frontend is built using React and Remix (A react full stack web framework)
- Backend is built using Django Rest Framework
- FaunaDB is used for data storage.
- Perform CRUD operations based on user permissions/roles.

Social Authentication/Authorization (<https://github.com/TobiLight/DRF-Authentication>)

An authentication module using social accounts for login or registration

- The login API is built using Python's Django Rest Framework and some third party package
- You can use your twitter or google account to login or create an account
